How do you improve on a bookcase? The Danes know how. They designed a bookcase that can sit down or stand up. They made it strong, allowing for one unit to stack on top of another. With the unique structural design of the **Domino**, you don't even need a back panel. This also allows the unit to be used as a room divider and keeps your stereo equipment cooler. Clean, classic Danish Design is back...and better than ever.

Finish Options: Available in Cherry or Espresso only.
